

Quarterly Population Highlights

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: JULY 1, 2013 | ISSUE #13-02

B.C. HIGHLIGHTS:

Please note that these population estimates are the first based on 2011 Census counts adjusted for net census undercoverage.

British Columbia's estimated population inched up to 4,581,978 on July 1, 2013. This represents an annual growth of 0.9%—lower than the growth experienced during the 2008-2009 peak. The second quarter of 2013 netted a total population increase of 14,031 persons, mainly due to international migration. B.C. lost an estimated 1,258 net persons to other Canadian jurisdictions, continuing an interprovincial migration trend that began almost two years previous. One out of every five persons acquired by the province during the first quarter was due to natural growth (births minus deaths).

B.C. Population April 1, 2013	4,567,947
Interprovincial migration	- 1,258
Add interprovincial arrivals	+ 17,172
Minus interprovincial exits	- 18,430
International migration	+ 12,407
Add immigrants	+ 10,106
Minus total net emigrants	- 2,577
Add net change in non-permanent residents	+ 4,878
Natural increase	+ 2,882
Add births	+ 10,962
Minus deaths	- 8,080
B.C. Population July 1, 2013	4,581,978

THE LAST TWELVE MONTHS:

B.C.'s total population increase over the twelve months ending July 1, 2013 was 38,670 persons, largely due to international migration. Immigrants (+35,705) and non-permanent residents (+11,466) continue to be a steady provider of population for the province. Interprovincial migration accounted for a net loss of 7,851 persons over the same period. Total net migration accounted for 70% (+35,175) of the population growth since July 1, 2012. The remainder was due to natural growth (+11,346).

NATIONAL OVERVIEW:

The population of Canada grew by a record 133,008 persons (+0.38%) to 35,158,304 during the second quarter of 2013. Leading the growth at a provincial and territorial level is Nunavut (+1.57%), Alberta (+1.08%) and Saskatchewan (+0.63%) followed. Manitoba (+0.32%), Quebec (+0.32%), Ontario (+0.30%), Prince Edward Island (+0.28%), Yukon (+0.19%) and New Brunswick (+0.05%) also expanded their population, while the remaining jurisdictions in Canada saw losses compared to the previous quarter.

Quarterly Population Highlights – continued...

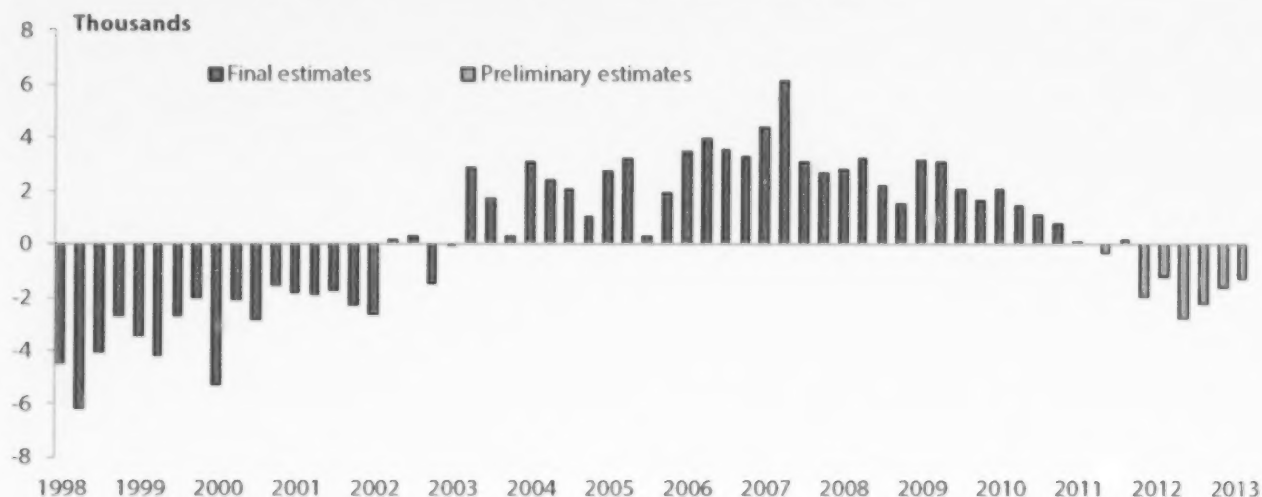

SECOND QUARTER INTERNATIONAL MIGRATION:

Second quarter net international migration reached the highest level in five years. More than ten thousand persons (10,106) immigrated to British Columbia during the second quarter of 2013, offset by about 2,500 persons who emigrated. The net change in non-permanent residents rose to 4,878 – far higher than recent, second-quarter levels. Immigration from Asia for the second quarter has slowed in recent years, dropping roughly 30% from levels witnessed in 2010. European immigration also dropped by similar margins, while the number of immigrants from Africa is up over 60% over the same period. The decline in second-quarter immigration from some of the top countries is as a result of a drop in overall immigration, as these top countries still supply B.C. with about eight in every ten immigrants. Most immigrants were accepted under the classes of family (42%), skilled worker (21%) and provincial/territorial nominee (19%).

SECOND QUARTER INTERPROVINCIAL MIGRATION:

British Columbia (-1,258) was one of eight provinces that reported a net loss of population to other Canadian jurisdictions; in B.C. an in flow of 17,172 persons was more than offset by an out flow of 18,430. British Columbia's net exchange with Alberta was negative with an estimated 2,106 more persons leaving B.C. for Alberta than coming to B.C. Conversely, net in migration from Ontario (+474) and Quebec (+482) to B.C. was positive. Alberta was the biggest net person-recipient province in the second quarter of 2013 with a net gain of 13,791 persons that far overshadowed the net inflow of 1,207 persons to Saskatchewan.

B.C. NET INTERPROVINCIAL MIGRATION BY QUARTER, Q1 1998 TO Q2 2013

Quarterly Population Highlights – continued...

DID YOU KNOW?

The 2011 Census of Canada was conducted on May 10, 2011. While data collected from the Census provides a characterization of the Canadian population at a point in time, it is not an entirely accurate picture. The Census doesn't count people who did not complete their census form (for example, perhaps being on holiday or travelling on business) – also called undercoverage – and it may count persons more than once (for example, parents sharing custody of their child(ren) and each adding them to both of their individual households as residents) – also called overcoverage. After census data collection is complete, a two year evaluation of its accuracy gets underway. This evaluation is referred to as the Census Coverage Studies, which estimate the amount of over- and undercoverage, otherwise known as census net undercoverage. The 2011 evaluation is now complete and a new series of population estimates based on the 2011 Census adjusted for census net undercoverage is available from Statistics Canada. With the exception of data from Citizenship and Immigration Canada, all figures presented in this quarterly release are based on the 2011 Census adjusted for census net undercoverage.
